

SigningHub Platform Preview

Centralize your document workflows and signing processes in three easy steps:

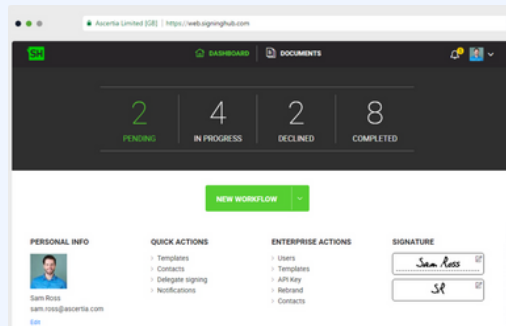

- **Prepare the workflow** (specify signers, their emails, and the signing order);
- **Set up the signature fields** (customize what information is needed per signer); and then
- **Share the document** (signers are automatically emailed when it's their turn to sign).

Then see, at a glance, the status of all your documents on the dashboard—never lose track of pending approvals again.
